

## Accredited Lead Paint Abatement Training Provider List

### What You Need to Know

### Courses Offered by Training Provider

The first step to provide a lead paint abatement service in Maryland is to complete training. The Worker and Project Designer categories are the only categories that only require training. The rest require training and accreditation (license). See the Lead Poisoning Prevention Program's website for a list of category descriptions and applications for accreditation. See the training provider's website for training schedules and fees.
