Why is it Important to Reduce the Amount of Food Waste?

In 2021, approximately 1,063,000 tons of food waste was recycled at organic recycling facilities such as composters, mulchers and anaerobic digesters. It takes a lot of money, water, and energy to produce our nation's food supply, and by disposing of wasted food into landfills and incinerators, all that money, water and energy is lost. Decomposition of food waste in a landfill leads to the generation of greenhouse gases, such as methane. Methane is one of the chief gases contributing to climate change. In addition, food waste takes up a large amount of space in a landfill, resulting in the filling and closing of landfills at a faster pace.

Much of the food that is discarded into the waste stream is perfectly fine and edible. This food would best be used to help feed people in need through donations to food rescue organizations or community groups. Excess edible food may also be used for animal feed on farms or in pet food. Other food waste can be sent to an organics recycling facility for composting or anaerobic digestion.

During the 2021 legislative session [HB264](#), was passed. The bill requires certain food waste generators that produce 2 tons of food residuals a week and within 30 miles of a composting facility to either reduce, divert to food rescue organizations, farms for animal feed operations, or compost or anaerobically digest the residuals.

MDE has also developed a [mapping tool](#) to assist food generators in locating permitted food waste organic recycling facilities around the state.

Eleven State Agencies Reach 30 Percent Recycling Rate in 2021

State government, as a whole, is required to recycle 30 percent of its waste. In 2021, eleven State agencies recycled at least 30 percent of their waste and five agencies recycled more than 40 percent. State government, as a whole, recycled 27.1 percent of the waste it generated. The following State agencies reached a recycling rate of at least 30 percent in 2020:

- Comptroller of Maryland;
- Dept. Of Environment;
- Dept. of Transportation;
- Dept. of Veterans Affairs;
- Maryland Environmental Service;
- Maryland Public Broadcasting Commission;
- Maryland School for the Deaf;
- Maryland State Archives;
- Maryland State Police;
- Subsequent Injury Fund;
- University System of Maryland.

Results for all State Agencies are available on the Maryland State Agencies 2021 Recycling Rates Table.

Maryland State Agencies 2021 Recycling Rates

Agency Name	No. of Sites	No. of Sites Reporting	No. of People	Total MRA Recycling 2021 (tons)	2021 MRA Recycling Rate (%)
Baltimore City Community College	1	1	324	9.69	7.16
